Civil Service Examination of Applicants for the Position.

There will be an examination for the position of superintendent and head nurse at the training school for nurses, Freedman's Hospital, on November 20-21. The institution is supported by the Government and the examination will be consequently held under the auspices of the United States Civil Service Commission.

The subjects which will form the basis of the examination are: English, anatomy and physiology, hygiene of hospital wards and sick room, routine requirements of hospital ward and sick room, general nursing, surgical nursing, obstetrical and gynecological nursing and experience. Applicants must be graduates of reputable training schools, and must have had at least three years' experience in hospital nursing. The age limit is twenty years or over, but the department desires that preference in certification be given to unmarried women between twenty-five and fifty years of age. The salary is \$900.

The position at present is held by Dr. Emma Reynolds, who was appointed to fill the position for three months as provided by the Civil Service law. The time limit will shortly expire and she will have to make room for the regularly examined and appointed applicant. Prior to Miss Reynolds' appointment, Miss Sarah C. Ebersole was head nurse.

"She resigned," said Dr. Severn, the Chief Examiner of the Civil Service Commission, "the early part of this year." When asked for the cause of her resignation he professed absolute ignorance and said the Board of Visitors would be the proper people to give this information. The Board of Visitors consists of Chief Clerk Evans, of the disbursing office of the Interior Department; Dr. Darby, of the Pension Office, and Mr. Pearson, of the Interior Department. Mr. Evans was asked as to the cause of Miss Ebersole's resignation, but he replied that he didn't know anything about it at all. He admitted that he was a member of the Board of Visitors, that the matter came up at the present time, and that he remembered the case well, but he refused to say anything about it. He said the public needn't know everything.

In speaking of the position about to be filled, the medical examiner of the Civil Service Commission said it is very important that the nurse-students selected by the head nurse should possess good mental capacity and excellent moral character. He is also of the opinion that it would considerably improve the service if applicants would be required to pass an examination and enquiry especially as to that is now, political influence is almost all that is required to secure a place as nurse-student.

He said that the training of colored nurses opens up to them a new field of usefulness, no which they are especially adapted by nature. The course supplies them with the scientific and practical knowledge, and it is difficult to even conjecture at the trained colored nurse will have in the future on the standing and condition of the white nurse.
